THE NEW CONFIGURATOR FROM CONTURA STEEL

See it in 3D before it's built.

We have rebuilt the configurator from the ground up. One program for the whole range, photorealistic 3D in every view and projects that are saved for you – now with frame-mounted and bracket-mounted units too.

- 3D in every view
- My projects – saved in the cloud
- Six languages, four currencies
- Floor stands and wall brackets

WORKFLOW

One program. The whole project.

Draw the units, collect them in the project and send everything in one go – as an inquiry or an order.

All products in one place

Sink units, frame- and bracket-mounted units, splash panels and shelf systems – change product without changing page.

Real 3D

Brushed stainless steel, real sinks and taps. Measure, rotate and see every change instantly.

One click to inquiry or order

The whole project is sent in one go – no separate order for each unit.

6 languages, 4 currencies

The program, customer documents and emails in your customer's language – with prices in SEK, NOK, DKK or EUR.

Documents ready

Product sheets with dimensions on the drawing and your marking on every unit – collected for the whole project, all the way to the workshop.

Take the model with you

Export the unit as IFC for BIM design, as GLB for visualisation or as a product data sheet in PDF.

NEW IN THE RANGE

Now you draw the base frame too.

Frame-mounted units, bracket-mounted units, corner benches and shelf systems are drawn and priced in the same program as the worktop – and ordered in the same project.

Frame-mounted unit NEW

Floor stand in stainless tube with grid or sheet shelves and skirt panels. The program suggests the number of leg pairs for the length and keeps the legs clear of the sinks.

Bracket-mounted unit NEW

The unit hangs on stainless wall brackets. The program works out how many are needed and tells you if the spacing between them gets too long.

Corner bench NEW

The custom sink unit as a corner bench, left or right – with or without a base frame.

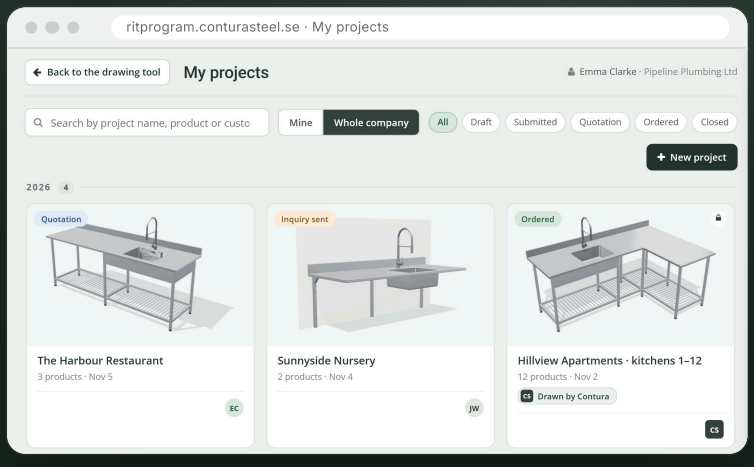

Shelf system NEW

Wall-hung stainless shelves on rails and brackets. You choose the length, number of shelves and spacing.

FOR RESELLERS

Your own login. Your prices. Your projects.

- **Your prices, instantly**
  Calculated on your agreement, per product group, as you draw.
- **Projects shared across the company**
  Everything you save is in My projects – for all colleagues, on any computer.
- **If we draw for you**
  Where we draw a project for you, it goes straight to you, marked "Drawn by Contura" – you review and order it yourselves.
- **Status all the way**
  See if a project is a draft, inquiry sent, quotation or ordered.
- **Hide prices in front of the customer**
  Show the unit to end customers without your purchase prices.

My projects – all the company's projects in one place, with status and who drew them. Open, change or duplicate in one click.

Apply for a login

Contact our customer service and we will set up your company and your users.
